

Sustainability Policy Statement

We recognise that as a responsible company we have a duty to conduct our operations in a manner that will not harm or detriment future generations. As part of our commitment we will consider the sustainability implications of any engineering materials, construction services and building operations for each project we undertake. We will undertake all operations in line with the following targets:

- Sustainable consumption and production:
We will use whole-life costing.
We will re-use materials where possible
- Climate change and energy:
We will minimize carbon emissions during construction works
We will reduce staff travel
- Natural resources and enhancing the environment:
We will minimize and conserve natural resources.
We will proactively create, manage and enhance wildlife habitats and natural landscapes.
- Creating sustainable communities.
We will contribute to social and economic regeneration by employing a workforce to operate in an environment of zero accidents and incidents with appropriate arrangements for continual professional and personnel development.
We will respect local people and places, by involving and engaging local communities as part of our corporate social responsibility.

Signed

J.G. McCarthy
Managing Director
